

US Population Analysis (2010-2024) — Summary

Dataset: United States population (Jul 1 each year), 2010-2024.

Key findings:

1. Population increased from 309.32M (2010) to 340.11M (2024) — an increase of ~30.79M ($\approx 9.95\%$).
2. Recent years (2023-2024) show accelerated growth driven largely by immigration.
3. YoY growth has fluctuated; 3-year rolling growth helps identify medium-term trends.

Recommendations:

- Businesses: target expansion in high-growth Sunbelt states (TX, FL, etc.).
- Policymakers: anticipate increased demand for housing, schools, and services in growth areas.
